The worksheet contains four house-shaped boxes, each representing a different multiplication and division problem. Each house has a roof with a number, a door, and two flower pots.

House 1 (Top Left): The roof contains the number 18. The left side of the roof contains the number 6, and the right side contains the number 3. Inside the house, there are four rows of equations:
Row 1: $6 \times 3 = 18$
Row 2: $3 \times 8 = 18$
Row 3: $18 : 6 = 3$
Row 4: $18 : 3 = 6$

House 2 (Top Right): The roof contains the number 56. The left side of the roof contains the number 7, and the right side contains the number 8. Inside the house, there are four rows of blank equations:
Row 1: $\square \times \square = \square$
Row 2: $\square \times \square = \square$
Row 3: $\square : \square = \square$
Row 4: $\square : \square = \square$

House 3 (Bottom Left): The roof contains the number 45. The left side of the roof contains the number 9, and the right side contains the number 5. Inside the house, there are four rows of blank equations:
Row 1: $\square \times \square = \square$
Row 2: $\square \times \square = \square$
Row 3: $\square : \square = \square$
Row 4: $\square : \square = \square$

House 4 (Bottom Right): The roof contains the number 32. The left side of the roof contains the number 8, and the right side contains the number 4. Inside the house, there are four rows of blank equations:
Row 1: $\square \times \square = \square$
Row 2: $\square \times \square = \square$
Row 3: $\square : \square = \square$
Row 4: $\square : \square = \square$
